SUMMARY

Software engineer building and maintaining production systems since 2020, working across development and infrastructure as each project requires. I currently develop and operate e-learning, online training and virtual reality platforms for public agencies and educational institutions, covering the full cycle: code, servers, databases and deployments.

EXPERIENCE

TDCLA (Tecnologías del Conocimiento Latinoamérica) Software Developer (Chile, remote) Mar 2024 – Present

Co-responsible, together with the technical lead, for the development and infrastructure of online training, e-learning and virtual reality platforms.

- Managed production infrastructure for training platforms (WordPress + FormaLMS, Moodle): Linux servers, PostgreSQL/MySQL databases, load balancers and shared NFS storage.
- Migrated production platforms from traditional servers to Kubernetes (Traefik, cert-manager), with automated SSL and multiple applications running on the same cluster.
- Migrated the production environment of a virtual reality platform (API, web application, RabbitMQ, resumable file uploads with TUS), including DNS cutover and a fallback of the previous environment.
- Deployed and operate a content distribution proxy (Node.js + Nginx on Docker) for VR headsets across educational campuses.
- Developed backends, APIs, automations, integrations (WordPress–Moodle plugin) and a reporting application (Flask + React/Vite + PostgreSQL) migrated from Laravel, using Python, PHP and JavaScript.
- Security and operational continuity: incident response on WordPress sites, hardening, backups with Borg/Borgmatic, monitoring with Grafana and maintenance of legacy applications.

CACEFI IT Engineer & Analyst (Concepción, Chile, hybrid) Jun 2021 – Oct 2023

- IT consulting: assessed the company's technology, selected tools, and designed and implemented an improvement plan.
- Implemented Microsoft 365 as the organization's cloud work platform, along with data migration and equipment upgrades.

BioBioApps SpA Web Developer (internship) (Concepción, Chile, hybrid) Nov 2020 – Feb 2021

- Developed backend and frontend modules in WordPress (PHP, JavaScript, HTML, CSS), and handled site maintenance and security review.

Corporación Newen Educa IT Support / Network Coordinator (internship) (Concepción, Chile, on-site) Jun 2020 – Sep 2020

SKILLS

☆ **Languages** Python, PHP, JavaScript, TypeScript, SQL, Bash	☆ **Frameworks** Flask, Streamlit, Laravel, React, Node.js, Express	☆ **Infrastructure & DevOps** Linux, Docker, Kubernetes, Traefik, Nginx, Apache, RabbitMQ, Grafana, Borg, GitLab CI, Git
☆ **Databases** PostgreSQL, MySQL, MongoDB	☆ **Platforms** Moodle, FormaLMS, WordPress, Pentaho	☆ **Cloud** DigitalOcean, AWS, Google Cloud

EDUCATION

Universidad del Bío-Bío (Computer and Informatics Engineering) Mar 2017 – Jun 2023
